

Please consider this a strong effort by myself to respectfully ask you, the FCC to reject the NAB's petition 04-160. I pay to enjoy the services of quality radio listening for traffic and weather information which is most valuable to myself and family while on road trips or just on my work commute. XM Satellite radio provides a great service of variety listening which is a great thing to have available for the small subscription I pay. Variety, quality and entertainment and information are what I get and pay for and I feel it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.
